Alamance County

Hypothetical solar land use

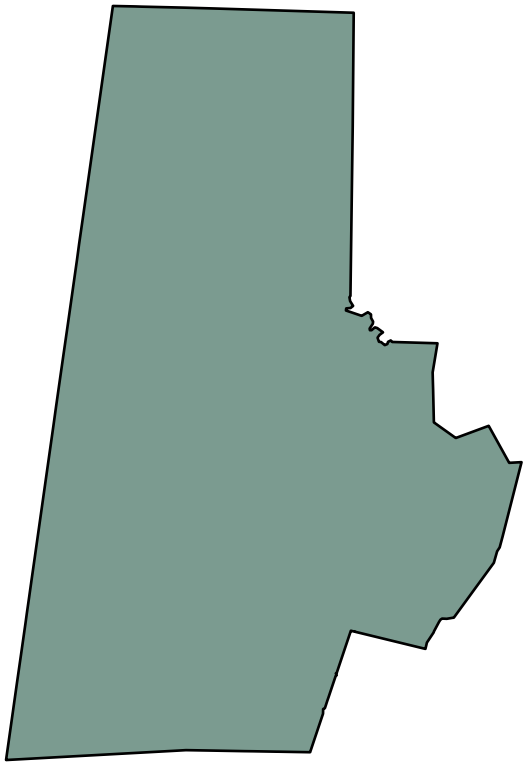

SOLAR LAND SCENARIO
10.97 km²
(1% of county land)

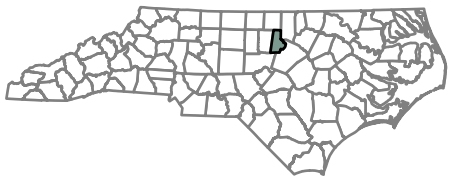

ESTIMATED CAPACITY
384 MW
ANNUAL ENERGY
672,535 MWh

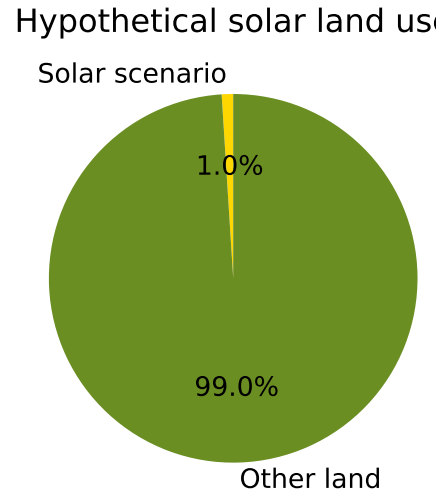

Source: U.S. Census Bureau (ALAND) | Scenario, not measured solar potential

Assumptions: 1% of land; 35 MW/km²; 20% capacity factor

Durham County

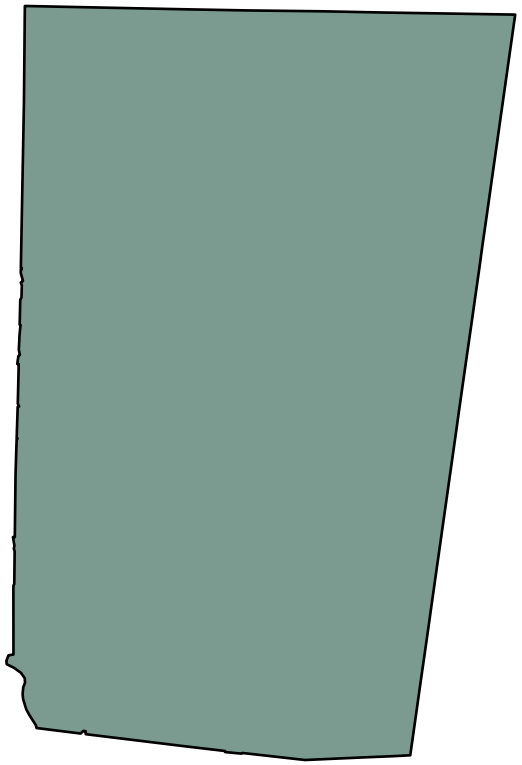

SOLAR LAND SCENARIO
7.45 km²
(1% of county land)

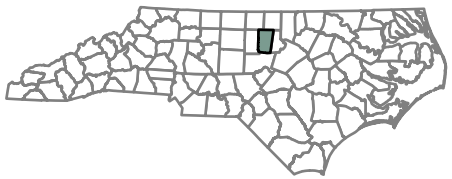

ESTIMATED CAPACITY
261 MW
ANNUAL ENERGY
456,680 MWh

Source: U.S. Census Bureau (ALAND) | Scenario, not measured solar potential

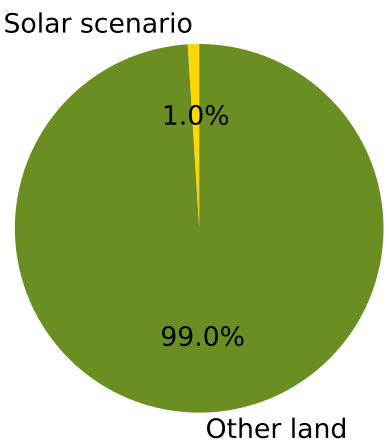

Assumptions: 1% of land; 35 MW/km²; 20% capacity factor

Orange County

Hypothetical solar land use

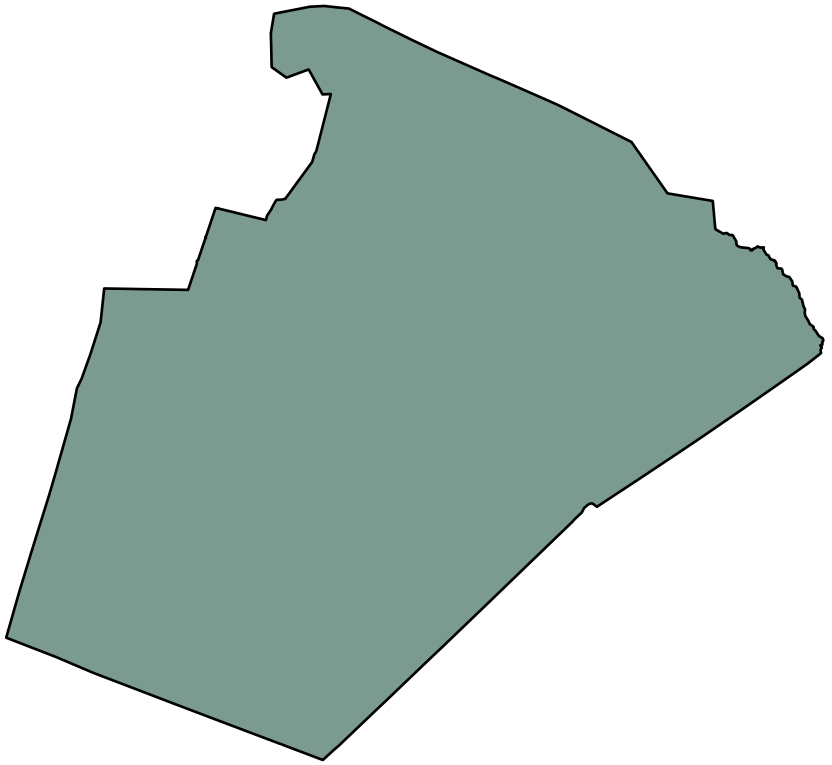

SOLAR LAND SCENARIO
10.30 km²
(1% of county land)

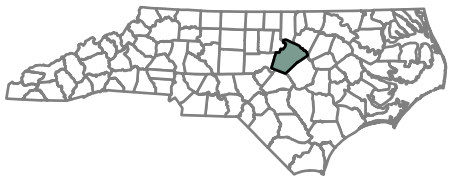

ESTIMATED CAPACITY
360 MW
ANNUAL ENERGY
631,370 MWh

Source: U.S. Census Bureau (ALAND) | Scenario, not measured solar potential

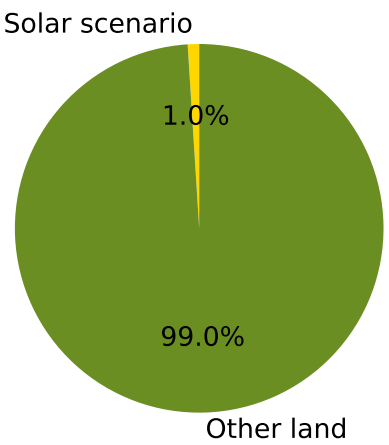

Assumptions: 1% of land; 35 MW/km²; 20% capacity factor

Wake County

Hypothetical solar land use

SOLAR LAND SCENARIO
21.62 km²
(1% of county land)

ESTIMATED CAPACITY
757 MW
ANNUAL ENERGY
1,325,506 MWh

Source: U.S. Census Bureau (ALAND) | Scenario, not measured solar potential

Assumptions: 1% of land; 35 MW/km²; 20% capacity factor
